## MAINTENANCE AND CARE:

### Daily maintenance:

➤ Remove the soiled water tank **1** by opening the clips **2** on both sides. Empty the soiled water tank by opening the plug **3** on the bottom of the tank, rinse/clean the tank.

➤ Remove and clean the soiled water tank suction hose **4**

➤ Remove, clean and dry the suction filter **5**

➤ Reconnect the suction hose **4** to the tank.

NOTE! The end of the white tube must point down!  
Reconnect the plug **3** to the tank bottom and put the tank back to the machine

➤ Empty the clear water tank by opening the cap **6** on the front of the tank. The clear water filter **7** is attached to the cap, check and clean it.

➤ Remove the suction hose **8** and rinse it

➤ Clean the squeegee **9**

➤ Remove the battery from the machine, connect it to the charger and connect the charger to outlet.

Check the charger's operation lights.

➤ Tilt the machine on the front wheels, remove brushes/pads **10** and clean them and check for wearing

➤ Press/tilt the lever **11** under the machine to place the machine in resting position.

### Weekly maintenance:

➤ Clean the machine from outside

➤ Check squeegee sealing strips and turn or replace them if necessary

### Cleaning result is bad:

○ suction hose **8** or squeegee **9** is blocked.

Turn off the machine before maintenance!

Please pay attention to the information in the instruction manual!
