

ProCore® SR Series Deep-Tine Aerators

REDUCE SOIL COMPACTION FOR HEALTHIER TURF.

ProCore SR Series deep-tine aerators alleviate subsurface soil compaction, helping to create an environment for turf to thrive. These durable and time-tested products are capable of withstanding the most extreme aeration conditions. From lightweight, precision machines to robust, heavy-duty machines to break up soil on even the most compact surfaces, the ProCore SR Series deep-tine aerators are the ultimate choice for performance and quality.

F E A T U R E S

Deep-tine aerification relieves soil compaction at lower soil levels than typical aerification. The tines fracture the soil creating channels through the root zone allowing oxygen, water and critical nutrients to penetrate deep into the soil profile.

- Multiple high-performance units for a wide variety of aeration applications.
- Aeration widths of 48"-75" (122-191 cm).
- Aeration depths to 16" (41 cm).
- Hydraulic depth control makes setting aeration depth easy.
- Solid and coring tines available for your specific aeration application.

The Deep-Tine Difference.
